COLCHICUM

A WONDER OF THE FLORAL
KINGDOM. DON'T FAIL TO
GET ONE OR MORE

These bulbs are ready now, should be ordered early
for best results.

**The Supply Last Fall Was Not Sufficient to
Meet the Demand. Order Now and be
Sure of Yours.**

Our illustration is from a photograph of this wonder of the floral kingdom. Blooms without vase, soil, water or care. Unique for table, room or window decoration. Rosy tinted blossoms shade to a pearly white and exhale refreshing fragrance.

Simply place the bulb in a dish, bowl, saucer or on the table or window sill in a little light and watch its beauty unfold. As the blooms fade and drop, cut them off and others will follow in quick succession.

When the blooming has ceased, the bulb may be potted or planted in the open garden or lawn, where the following spring they will develop a beautiful, broad, deep-colored foliage.

Remove from bed about July First, dry the bulb in darkness for a few weeks and use for indoor decoration, as at first.

THERE IS NO CLASS OF FLOWERS so much prized as those which are produced from bulbs. Closely following the disappearance of snow and long before ordinary outdoor flowers are in bloom, we may have, in their perfection, the hardy Crocus; then the fragrant and stately Hyacinths; a little later the varied and brilliant Tulips and the magnificent varieties of Narcissus. These give an air of distinction and refinement to any lawn or garden, affording much pleasure to all who pass by.

WHEN TO PLANT We would particularly emphasize the fact that **fall** and **not spring** is the time to plant all kinds of spring-flowering bulbs. The bulbs should be planted as soon after September as possible, so that the roots will make good growth before the cold weather sets in. They may be set out from then until the ground becomes frozen. They require a moderately rich soil. When the ground freezes hard, the bed should be covered with three or four inches of leaves or dry litter. Too early and heavy covering starts the tops prematurely. In the spring the covering should be carefully removed.

Lily Candidum.

LILY CANDIDUM

Also Known as Madonna or Annunciation Lily

Imported by us direct from France.

The old-fashioned pure white garden Lily, also known as Annunciation Lily. One of the hardiest flowers, snow-white, with yellow stamens and sweetest fragrance. It must be planted in the early autumn to succeed well, as it makes its leaf growth at once after planting, and prepares itself for early flowering. As spotlessly pure as the Easter, but with broad, widely opened flowers. Tall and stately growing and a sure bloomer. Fragrant. Large bulbs 35 cents each, 3 for \$1.00, 6 for \$1.80.

Hardy Regal or Royal Lily

"One of the most beautiful of all known lilies. Highly recommended for general culture both for the open ground and for pots."

The outside of the flower is white, very faintly tinged with yellow at the base of the trumpet, and with pink at the point. The midribs are purple. The inside shows a bright canary-yellow deep in the throat, shading to pure white with just a hint of pink showing through from the outside. Mature bulbs produce plants 3 to 4 feet high, bearing 3 to 10 flowers.

Price, 60 cents each; 3 for \$1.75; 12 for \$6.00.

Other Hardy Lilies do not arrive from the foreign growers until in December and will be offered in Spring Catalog.

HYACINTHS

Special Notice Hyacinths, Tulips, Narcissi and other fall bulbs will not arrive from Europe until some time in September.

Six Extra Fine Single Dutch Hyacinths

This list contains such only as are real beauties, and a few varieties, which are not entirely new, but to which we wish to draw your special attention. Price, 25c each, two for 45c, six for \$1.25, postpaid.

ARENTE ARENSEN

Snow-white. The spike is unusually well filled and has a perfect round shape. The broad, wide open petals are of intense whiteness and make the flower look unusually bright and pretty.

BUFF BEAUTY

Buff orange-yellow, long narrow truss on strong stem. A very peculiar color.

GENERAL DE WET

Light pink. Splendid for bedding as well as for forcing. The medium sized bells are of a lively light pink color with a lighter center and form a big, loose spike.

LADY DERBY

Bright rose-pink. Is rapidly becoming the leading pink pot hyacinth owing to its lovely shade of pink, its perfect spike on a strong stem and its splendid forcing qualities.

MYOSOTIS (Forget-Me-Not)

Beautiful blue, the only variety of this shade, large, strong spike. Early flowering.

PERLE BRILLIANT

Light blue, tinged lavender. Produces an enormous spike of perfect shape and a big, smooth bulb. One of the best of the latest blue varieties.

NAMED DUTCH HYACINTHS

LARGE, SELECTED, PERFECT BULBS OF FINEST QUALITY

HYACINTHS will be very scarce this Fall, and in consequence are somewhat higher priced than formerly. We have endeavored to get the very best in quality from best Holland growers. We import direct from the best known growers and customers may be assured that no better bulbs are to be had for the price asked.

For winter and early spring flowering nothing surpasses the Hyacinth. It is sure to bloom and give satisfaction in the house during the winter or in the garden in early spring. Its large spikes resemble nothing else in cultivation. Rather than offer a long, confusing list of varieties, we have carefully selected twelve each of Singles and Doubles, embracing all the shades of this beautiful flower, each one being the largest, strongest and best of its color.

TWELVE BEST NAMED SINGLE HYACINTHS

We consider the Single Hyacinths more useful and valuable than the double varieties. They are better for forcing, more vigorous in growth, and produce stronger spikes of bloom; which are generally of better substance.

Price, 20 Cents Each; Any Six for \$1.10; or the Full Set of Twelve for \$2.00, Postpaid.

ALBERTINA—Pure white, very large, compact spike, fine for early forcing.

ENCHANTRESS—Most delicate porcelain-blue. One of the most beautiful light-blue Hyacinths. The splendid, well finished truss has a strong stem and makes it excellent for growing in pots. The blue color grows lighter towards the center of the bells.

GERTRUDE—Dark pink. The most popular pot and bedding Hyacinth, owing to its color and compact growth. Grown in larger quantities than any other kind.

GIGANTEA—Large, tall spike; large and very shapely, with drooping bells. Flowers shell-pink inside and deep pink outside, touched with violet. A superb sort.

GRANDE BLANCHE—Blush-white. Called also the white Regulus, being a sport of this old variety. Splendid bedder and early forcer.

GRAND MAITRE—Deep lavender blue, shaded darker blue. The leading and most popular blue. The bright blue bells form an elegant, somewhat loose spike of immense size and perfect shape.

INNOCENCE—This superb Hyacinth is grand. Immense spike of large pure ivory bells, waxy in appearance, vying with the snow in purity; fragrance is delicate, yet penetrating.

KING OF THE BLUES—Rich dark blue, the finest of the deep blues; extra large, well furnished broad spikes with large bells; erect and fine for pots.

KING OF THE BELGIANS—Bright scarlet. The most popular of the scarlets. Its upright well filled spikes make it a good pot Hyacinth and as clear bright colors are mostly used for bedding, it is one of the most popular bedders. Immense stock.

LORD BALFOUR—Lilac-rose tinged dark violet; very early, enormous truss; the best in its color.

THE VICTORY—Bright, glistening red outdoors; under glass a fine, dark pink; long, well-filled spike. Brilliant bedding sort, strong stem and lasting color.

YELLOW HAMMER—Golden-yellow. The most popular of the yellows and a splendid forcer. The medium-sized bells form a very compact, ball-shaped truss, which makes one think of a hammer, hence its name.

TWELVE BEST NAMED DOUBLE HYACINTHS

Price, 20 Cents Each; Six for \$1.10; Full Set of Twelve for \$2.00, Postpaid.

CHESTNUT FLOWER—Extra large truss; bright rose, the flower resembles much that of the horse-chestnut, hence its name.

DELICATA—Clear porcelain-blue; extra large bells.

GRAND CONQUEROR—Clear bright carmine, extra large and handsome in every way. One of the best and most beautiful of all.

ISABELLA—Fine blush-white; grand spike and large bulb.

Early Flowering Named Tulips

TULIPS make one of the best, brightest and most attractive and satisfactory flowers for the table that can be used. They will also last as long or longer than any cut flowers which are used for decorations. A bed of assorted Tulips used for this purpose will furnish a continuous feast for weeks during the early spring, when there are practically no other outdoor flowers in bloom. The culture of Tulips is the same as that of Hyacinths, except that the bulbs should be planted about three inches deep and four to six inches apart. Tulips are perfectly hardy, so only a slight protection is required from extreme cold and sharp winds.

NOTE—The varieties marked with a * are equally good for pot culture and for bedding. The letters D, M or T indicate the comparative height when grown outdoors, whether Dwarf, Medium or Tall. Each bulb is wrapped and labeled true to name.

LATE or MAY-FLOWERING COTTAGE GARDEN TULIPS

THIS beautiful class is now very popular. They are quite distinct from the early-flowering sorts offered on the preceding pages, coming into bloom two to three weeks later than the early flowering types, and extending the Tulip season over a period of four weeks or more. On account of their extreme hardiness, they are specially adapted for the permanent hardy flower border, where they should be liberally planted in clumps or masses. They may also be naturalized in grass, wild gardens, etc. For bedding they are superb, while as cut flowers, having long stems with flowers of great substance, they stand in perfect condition for a long time. In planting, the bulbs should be set a little deeper than early Tulips, a covering of four inches being about right.

Our Collection Embraces all the Best Types of the Garden Tulip and Your Order Should include at Least a Few of these Most Satisfactory Bulbs.

YELLOW DARWIN (New)—A beautiful and striking Tulip having a fine deep yellow flower; color, solid; very fine.

SUPERFINE, Mixed Darwin Tulips

Our supply of these comes from a specialist who grows over fifty sorts, most of which are represented in this mixture. Price, 70 cents per Dozen; \$5.50 per Hundred. (50 at 100 rate.)

PARROT OR DRAGON TULIP

The most beautiful and interesting class of late flowering Tulips which should be in every garden. The flowers are very large and perfect in shape, the petals are corrugated and toothed, while the color is the most striking combination of crimson and golden-yellow, streaked and edged with green, resembling the plumage of a parrot, whence these Tulips derive their name. A bed of these makes a gorgeous display, paying a hundred fold for any trouble that may be bestowed upon them. **Fine large bulbs, mixed colors, price, six for 40c; 75c per dozen; \$5.50 per hundred.**

BREEDER TULIPS

A distinct class of late flowering Tulips, allied to the Darwin and Cottage types, which is just now enjoying a revival of its old time prestige. The present popularity of "art tones" in all classes of flowers is mainly responsible for this quickened interest, the Breeders furnishing beautiful combinations of dull or soft tones in buff, reds, browns, bronze or purple, in extremely large and well-shaped flowers, on two or three foot stems.

Not well adapted to forcing, but of superior value in every out-door usage.

Price, 10 Cents Each; \$1.00 per Dozen; \$7.00 per 100.

CHESTNUT—Very dark brown, almost black, shows off splendidly when planted together with a yellow Tulip.

GOLIATH—Dark rosy-violet flushed with rose-brown. An enormous flower of a peculiar odd color, which we cannot very well describe, but which greatly attracts the attention.

MEDEA—Salmon-carmine. A large, attractive flower on a gracefully drooping stem, which makes it splendid for cutting and bedding both.

NOIR VERITABLE—Very dark violet, long known as the Black Tulip.

SUNRISE—Ruddy apricot with yellow edge. The red color on the outside grows lighter towards the edge, an odd but attractive variety; one of the few in this class which can be supplied in sufficient quantities.

BREEDERS IN SPLENDID MIXTURE, 75 CENTS PER DOZEN; \$6.00 PER 100.

Narcissus, Daffodils and Jonquils

THE FLOWER OF THE POETS

THERE are no hardy bulbous plants which have more points of merit than the Narcissus or Daffodils. Perfectly hardy, growing and doing well in almost any and every position, sun or shade, moist or dry. They turn our gardens, lawns and woodland walks into gorgeous masses of gold and silver, with a fragrance that is enchanting. They are all of the easiest culture, perfectly hardy, and can be grown in any light garden soil. When grown as pot plants in the house they can be brought into bloom at Christmas, and by planting at different times, will bloom continually from December till April. Excepting the Polyanthus varieties offered on next page, they are perfectly hardy, even in the Northern states; growing and doing well in almost and every position, in sun or shade, moist or dry. They will succeed best, however, in a thoroughly drained, tolerably rich soil. If the position is one partially shaded from the hot sunshine in the spring, the flowers will retain their beauty for a much longer period than if more exposed.

Large Trumpet Narcissus

This type is the showiest of the genus, and also the most useful, growing easily either indoors or in the open ground.

NOTE—In describing Narcissus, it is usual to give the color of the trumpet or crown and the color of the perianth or petals surrounding the trumpet.

Two-Colored Varieties, White and Yellow

AJAX PRINCEPS—Very early. This is one of the most popular winter-flowering and forcing varieties grown. Flowers large, perianth sulphur, with an immense rich yellow trumpet. Price, 6 cents each; 12 for 60 cents.

MRS. WALTER WARE—The white perianth petals are broad and large, the yellow trumpet long, well expanded and frilled at the brim; a strong grower and free bloomer. Price, 8 cents each; 12 for 80 cents.

VICTORIA BICOLOR—Perianth snow-white, trumpet rich yellow, serrated and flanged at the edges, large in outline, and of rare beauty for cutting. Price, 8 cents each; 12 for 80 cents.

GOLDEN SPUR—Large, spreading, full, deep yellow perianth, trumpet golden-yellow. A charming, richly perfumed flower, and one of the very best of the Golden Trumpets. In favorable situations the flower stalks attain a height of two feet. Price, 8 cents each; 12 for 80 cents.

KING ALFRED

Uniform golden-yellow. Unrivalled in size and beauty. Its round fleshy petals, its immense, elegantly recurved and beautifully fluted trumpet, in fact every part of this plant shows its superiority. Rightly called the King of Daffodils. Price, 20 cents; three for 50 cents.

TRUMPET MAJOR—(Single Von Sion.) A large and shapely flower of a rich yellow color throughout. Comes into bloom early and is excellent for forcing, bedding or naturalizing. Price, 8 cents each; 12 for 80 cents.

Trumpet-flowered

All White Trumpet Narcissus

MRS. THOMPSON—A new and extra fine, pure white variety, large and handsome, with an elegantly frilled trumpet. It is a strong grower, early and free bloomer, splendid for pot culture, fencing and the garden border. Price, 8 cents each; 12 for 80 cents.

MADAME DE GRAAF—The most beautiful of white varieties. Both trumpet and perianth are clear white; one of the best for forcing; magnificent. Price, 10 cents each; 6 for 50 cents.

MRS. LANGTRY—Flowers pure white, star-like. Cup at first slightly tinted, but changes to pure white. Very pretty, exceedingly sweet-scented. A very free bloomer, being fine for forcing as well as for bedding and open ground culture. Price, 8 cents each; 12 for 80 cents.

Chalice-flowered

POLYANTHUS NARCISSUS

OR BUNCH-FLOWERED DAFFODILS.

The Polyanthus varieties of Narcissus are not only beautiful, but deliciously sweet scented, and of the easiest culture, suitable for window garden, conservatory or garden; very free flowering and continuing long in bloom. Their tall spikes of bloom bear from six to one dozen flowers each. The pure white petals and gold cups of some varieties; the yellow with deep orange cups of others and the self whites and yellows render them great favorites. They are not quite so hardy as the other types of Narcissus, and therefore should be carefully protected in cold climates when grown in the garden. South of the freezing belt they are splendid for gardens.

NEWTON—Large yellow flower with orange cup. This is very distinct and a free bloomer. Fine for pots. Price, 10 cents each; six for 50 cents.

We will send one each of the five varieties including Paper White for 45 cents.

Narcissus, Paper White.

PAPER-WHITE GRANDIFLORA

This is the earliest of all, blooming by Christmas, and with its long-stemmed clusters of starry-white flowers—much larger than the old variety—is indeed most beautiful; very fragrant also. This variety is perhaps more largely forced for cut flowers than any other, millions of them being used for the large flower markets of the world. Should be planted at intervals of a week for long succession of bloom. Strong bulbs, sure to bloom, 8 cents each; 12 for 80 cents. Price by express, \$6.50 per 100.

Narcissus Jonquilla, or Jonquils

Much prized for their charming golden and deliciously sweet-scented flowers; perfectly hardy, and flowering very early in the spring. Admirably adapted for winter forcing.

SINGLE JONQUIL—The well-known favorite, delicately scented and beautiful for forcing. Rich yellow, very fragrant. Price, four for 15 cents; 40 cents per dozen.

DOUBLE JONQUIL—Heads of small but very double deep golden-yellow flowers, powerfully scented and good for forcing. Price, four for 20 cents; 50 cents per dozen.

CAMPERNELLE REGULOSIS—Large six lobed yellow flowers, four to six on a stem; fine for forcing, and the one generally preferred by florists. Price, four for 20 cents; 50 cents per dozen.

Grand Soleil d'Or

A charming rich yellow flower with deep reddish cup. Thousands of this variety are grown in Scilly Isles for sale in the London market. Flowers are almost identical with the Chinese Sacred Lily except in color, and may be grown in water like the Chinese variety.

As compared with the Chinese Sacred Lily this produces a much larger flower, though the bulb is smaller. Its fragrance is even better and its color a deep glowing yellow. Each bulb produces several spikes of bloom and thrives in any soil, sand, or pebbles and water. Bulbs bloom very quickly after planting and may always be had for Christmas and New Year's, or even earlier. No winter flower is more beautiful, fragrant, or easier grown. May be had in flower at any time all winter, stands freezing and any amount of abuse, and is sure to do well in any window. Three or four should be planted in a five-inch pot, or a bowl of pebbles and water. Price, 20 cents each; 12 for \$2.00.

GRAND DUCHESS OXALIS

There is no doubt about its being one of the most beautiful and taking winter flowers it is possible to have. Blossoms immense, borne well above the foliage; leaves large, clover-shaped and handsome. A most persistent bloomer, remaining constantly in flower from November to June. We have three colors to offer, bright pink, lavender and pure white.

Price, three for 10 cents, or 35 cents per dozen.

GRAND DUCHESS PINK—Enormous size, bright rosy-pink. Finest recent novelty, and has been widely advertised.

GRAND DUCHESS WHITE—New; pure snow-white. A grand contrast to the above.

LAVENDER—A fine large flower of a unique lavender color. Plant has a branching habit, not so compact as the white or pink.

BERMUDA BUTTERCUP OXALIS

A fine, robust-growing, large flowering sort from Bermuda. Blooms in enormous panicles, each flower being as large as a silver half-dollar, and of a clear, bright yellow color. Easily grown in any window and a most satisfactory winter bloomer.

Price, three for 10 cents; 35 cents per dozen.

Feathered or Cockade HYACINTHS

A real curiosity. First, a frizzled cockade-like spike an inch or two in length appears above the soil, and as it slowly rises on its long stalk it becomes five to six times as long as at first, developing into a long feathery plume, and lasting for weeks in that condition. One of those pretty, odd things that everybody likes. Perfectly hardy in the garden and fine for pots. Price, twelve for 50 cents.

GRAPE HYACINTHS

Very pretty, producing flowering spikes about six inches high, with little round bells so arranged as to resemble a bunch of grapes. Admirable for permanent beds and edgings and partially shaded situations, where they should be planted in groups of one dozen or more, where they will soon spread and being perfectly hardy will take care of themselves. They are very pretty when grown six in a pot in the house for winter flowering.

BLUE—Price, 40 cents per dozen; \$3.25 per 100.

WHITE—Price, 50 cents per dozen; \$4.00 per 100.

FRITILLARIA MELEAGRIS (Guinea Hen Flower)

Singular dwarf spring-flowering plants, bearing large, pendant, bell-shaped flowers of various colors, yellow, white, black, purple striped and splashed and checkered in the most curious way. They are invaluable for pot culture and exceedingly pretty when grown in large groups in the garden border or wild garden in a dry situation. Mixed varieties, 10 cents each; \$1.00 per dozen; \$8.00 per 100.

IXIAS

The graceful flower spikes of the Ixias remind one of Gladiolus, but the flowers are very distinct, being round and well opened. Their brilliant colors and vividly contrasting markings have made them quite popular. For pot culture, plant six in a five-inch pot, and treat as Hyacinths. For outdoor culture they should be planted in a somewhat sheltered situation and protected with leaves or straw.

MIXED SORTS—Many varieties of rich shades and colors. Price, three for 10 cents; 35 cents per dozen.

CHIONODOXA LUCILAE Glory of the Snow

These bulbs are very popular, and deservedly so, for their lovely blue and white flowers, produced in long sprays, are seen in the garden among the earliest spring flowers—sometimes even before the snow has disappeared. The bulbs are perfectly hardy and make a fine display when planted in masses outdoors. For window culture they are fully as charming as are Freesias. They bloom very early, commonly by Christmas. Selected bulbs. Price, 50 cents per dozen.

SCILLA SIBIRICA

The Siberian Scilla, or Squill, has flowers of a lovely ultra-marine blue color, borne in graceful spikes. In the house it blooms early, like the Roman Hyacinths, and forms a beautiful contrast with them. In the open ground they are quite hardy, and especially fine planted in small beds or with Snowdrops, and like them, frequently blooming before the snow has gone. Price, 50 cents per dozen.

SCILLA ALBA

This has exactly the same flower as Scilla Sibirica, excepting that it is pure white. Price, 50 cents per dozen.

CROCUS

FIRST GAY FLOWERS OF SPRING—LARGE FLOWERING VARIETIES

Beautiful for Growing in Pots, Among the EARLIEST to Bloom on the Lawn in the Spring

DIRECTIONS FOR PLANTING With a trowel or spade make a slanting opening about two inches deep, put in the bulbs, then with the foot press back the sod. This is an easy way to plant flowers that will be a sheet of bloom almost before the grass is green. They will care for themselves, blooming early amid the grass, and dying down to the bulb in ample time to be entirely out of the way of the lawn mower. Giant Crocus in Colors, White, Blue, Striped, Yellow or All Colors Mixed, All Large Bulbs, 35 Cents per Dozen, \$2.50 per hundred, Postpaid.

WINTER-BLOOMING FREESIAS

WHITE FREESIA (Purity)—A grand Freesia. The flowers are two inches long and about the same in width, and borne in clusters of six to ten. The body of the flower is pure white, with lower segments spotted lemon-yellow. The perfume is most delicate. Its cultivation is the simplest, requiring only to be potted in October, to be watered sparingly at first, placed in a sunny window and watered more as growth progresses. When out of flower, store in some place and repot at proper season in fresh soil for another year's growth. Price, 6 for 25 cents; 45 cents per dozen.

NEW GIANT COLORED FREESIAS

A new class of large flowered, strong growing Freesias of various and distinct colors. The size, richness of color and beauty of these Freesias will be a revelation to all.

GENERAL PERSHING—Lavender-pink, yellow lip somewhat of a bronze cast. 10c. each, 6 for 50c., 12 for 90c.

Mixed Colors—Six for 40 cents; twelve for 75 cents.

GIANT SNOWDROPS

The Charming Snow-drop is one of the First Flowers to Herald the Approach of Spring.

Beautiful dwarf white flowers, pushing up through the snow in the spring, a habit from which arose this name. They are lovely little blossoms, and should be found in every garden. Indoors they are equally pretty and easily brought into bloom. Being dwarf, they are usually planted along walks or the margins of beds. The Giant Snowdrops we offer are much superior to the common varieties, producing large flowers.

DOUBLE SNOWDROP—(Galanthus Nivalis fl. pl.) Flowers perfectly double, pure white. Price, 65 cents per dozen; \$5.00 per 100.

GIANT SINGLE SNOWDROP—(Galanthus Elwesii.) The largest and most beautiful, flowers snow-white, with emerald-green tube. Price, 45 cents per dozen; \$3.75 per 100.

Great Surplus Bulb Collections

SENT ONLY AFTER NOVEMBER 10th.

In importing enormous quantities of bulbs from Holland, France, China, Japan, Bermuda, etc., we find it impossible to estimate what the exact demand will be, and to order just the right quantity of each variety, so that we usually have a surplus of many varieties including the very choicest and most expensive. As they cannot be kept over, we must close them out at the end of the season, and offer them to our patrons in collections, strictly of our own selection, at a big sacrifice rate.

These collections may be ordered at any time, but will not be sent until the rush trade is over, about November 10th.

Surplus Bulb Collection No. 1 for One Dollar, Postpaid

This will consist of a very generous lot of miscellaneous bulbs, and will be sent by mail, postpaid, for \$1.00.

Surplus Bulb Collection No. 2, by Express, (not prepaid) for \$2.

This will contain a larger proportion of the heavier and more expensive bulbs, of the finest varieties, and will be worth far more than the price asked for it. If express shipment is not desirable, send 25 cents extra for postage.

OUR "GIANT" COLLECTION OF LARGE Two-Year-Old Ever-Blooming Roses FOR IMMEDIATE EFFECT

THESE large Roses have become so popular among our customers that we devote a great deal of room to them, growing them in constantly increasing number. These bushes are two years old, strong and healthy. They make, of course, more of an appearance from the first than does the smaller stock, having practically a year the advantage in all respects—an advantage for which we find many persons willing to incur the additional expense.

The selection must be left to us, and we will send only strictly high-grade Roses. All will be different and all correctly labeled.

FINE PLANTS FROM TWO AND A HALF INCH POTS (POSTAGE PREPAID)

THEY are suitable for flowering in pots in the house during winter, and then in spring plant out in the garden, where they will continue to bloom all summer. If you do not desire them for house flowering, they can (at least in southern latitudes) be planted out in the flower border and covered over lightly with straw, evergreen boughs or any light material, to be removed in early spring. This will give you flowers much earlier than if you waited until spring to plant. This collection is strictly of our own selection, and we guarantee them to be well-rooted, to reach you in good condition and to be a fine assortment of colors, all correctly labeled. Many of our very best varieties will be included in the collection.

Price, 20 cents each; Two for 35 Cents. Two-year-old plants 40 cents each, 2 for 75 cents.

These charming Roses are of the same creeping habit as Rosa Wichuraiana, trailing over the ground or creeping about the trunks of trees and pillars with delightful effect. These Roses are of intense hardness, and succeed in all soils, even on the poorest and driest conceivable.

Hiawatha Distinctly different from other Ramblers. Its small flowers, deep ruby-crimson, accentuated by a white eye, are uniquely borne in long trails of forty to fifty blooms. This variety is very popular for training on fences, not only as a covering for the fence, but because it is really one of the prettiest Roses of its kind.

Rosa Wichuraiana (Memorial Rose). Handsome for covering rockeries, mounds or embankments; specially valuable for cemetery planting. The pure white, single flowers appear in greater profusion during the month of July, while its almost evergreen foliage makes it very desirable at all seasons of the year.

ROSES THAT GROW AND BLOOM ROSES

SUPPERB COLLECTION OF EVER-BLOOMING HYBRID TEA ROSES

OWING to limited space in fall catalogue we cannot enumerate and describe as many varieties of Roses as we do in spring. We can, however, furnish all Roses mentioned in our spring catalogue. The demand for Roses, during the autumn months, is largely confined to house culture during the winter. In the spring they may be transplanted in the open ground, where they will continue to bloom throughout the summer. Fall planting of Roses in open ground is recommended only for the Southern and Pacific Coast states where the fall and winter is the most favorable time.

Champion of the World Color rich glossy pink, delightfully fragrant, and such a strong vigorous grower that it is almost invulnerable.

Crusader (Hybrid Tea.) Color rich velvety crimson. Buds and blooms immense and of great substance, very full and double and the largest Rose of its color we have yet seen. GLORY—This splendid novelty is quite remontant, florets and clusters are very large; ground color blue, very much like the Cattleya Orchid. The upper petals contain two large purple magenta-red spots, distinctly veined. An exceedingly beautiful and entirely new color in Pelargoniums. This kind has a very robust growth.

LUCY BECKER—This grand novelty is a sport of Easter Greeting, and is like it in everything but color, which is a rosy-pink. It is if anything even more free in bloom.

Argentea Guttata

This variety is an introduction of M. Lemoine and is a cross between Olbia and Alba Picta. This beautiful sort has the silvery blotches of Alba Picta, the grace and beauty of growth of Olbia. It has purple-bronze leaves, oblong in shape, with silvery markings, and is in every way a most beautiful Begonia. Produces white flowers in bunches on ends of growth stems. Good for house culture.

ALBA PICTA—Long, pointed, slender leaves, thickly spotted with silvery-white. Foliage small and elegant.

ALBA PERFECTA GRANDIFLORA

—We doubt if there is a white-flowered variety that equals it. The foliage resembles Rubra in shape, but it is lighter green, while the flower panicles are much handsomer. It

is a pure white flowering Begonia of much merit.

CORALLINE LUCERNE (The Wonderful Flowering Begonia)—This new Begonia has simply taken everybody who has seen it by storm. It certainly is a wonder. The blooms last from a month to six weeks, and are borne in immense clusters, almost hiding the plant. The color is bright coral red, changing to a delicate pink. It is past the power of speech to describe it. A wonder. Price, 30 cents each.

TWO EXTRA FINE VARIETIES OF REX BEGONIAS

Louise Closson.

LOUISE CLOSSON—Purplish-tinted. One of the richest and most beautiful of the Rex family. The coloring is simply magnificent, center of leaf deep maroon with broad band of silvery rose, edged bronze, giving the whole leaf a purplish tint. The oddest color of all the Rex. Price, 30 cents.

SPECULATA—Quite a novelty in the Rex type. Leaves are in the form of a grape leaf. Color is a bright green, with a background of chocolate; veins of a light pea-green, the whole leaf spotted with silver. In bloom it is magnificent; the panicles composed of great numbers of individual pink blooms, are lifted high and spray-like quite clear of foliage. Price, 25 cents each.

Metallica

METALLICA—A shrubby free-blooming variety, with triangular leaves; under side of leaf and stem hairy; the surface a lustrous metallic or bronze color, veined darker, flowers white.

CHATELLAINE SUPREME—This Begonia is undoubtedly the freest blooming variety known. Is of easy culture, low bushy habit and literally covered the entire year with a wealth of bright pink flowers with yellow stamens. It well merits the name of Eber-blooming Begonia.

PINK RUBRA—We doubt if there is a pink flowered variety that equals it. The foliage resembles Rubra in shape, but is a lighter green, while the flower panicles are much handsomer. It is a pure pinkowering Begonia.

PICTA ROSEA—Very compact in growth, forming a dense, well-proportioned bush with rich green foliage, spotted with silver. Flower rosy-flesh color shaded with a silvery-pink and enlivened with dense clusters of yellow anthers. Most wonderful flowering Begonia within our knowledge.

SANDERSONI—Bushy growing variety; glossy deep green leaves; flowers in clusters of drooping, scarlet heart-shaped buds.

THURSTONI—The under side of the leaves is a rich purplish-red, the veins very prominent, while the face or upper side is a bronzy-green, shaded with crimson and olive, with a peculiar glossy-metallic luster over all. Flowers rosy-white, in large clusters well above the foliage. The plant has a fine habit.

UNNAMED REX BEGONIAS

Rex Begonia

Nature has bestowed on Rex Begonias many of her choicest gifts, uniting the radiance and brilliancy of precious jewels, the shining luster of metals, with the beautiful colors and textures of the most costly fabrics. The leaves alone possess all these charms, while the dainty flowers add

lightness and grace. Give them a soil composed of rich loam, woods earth and sharp sand. They require a warm, moist atmosphere and a shady situation. Do not allow the sun to strike the leaves while wet, and do not over-water. Nothing can surpass them for the window or conservatory culture; they may be planted in a shady situation under trees or alongside of the house. Rex varieties make immense leaves. We can furnish REX BEGONIAS in choice sorts at 25 cents each; three for 65 cents.

New Superb French Hydrangeas

The Newest and Finest Varieties

This species of Hydrangea is generally hardy in the South and throughout the Middle States with some protection during winter months, and here they will flower profusely from June to October. In our Northern States they will give better results when used as pot plants. The plants succeed rather better in a shady place than where it is too sunny, on which account they are valuable for house culture. The pot plants require a liberal supply of water during their season of growth and flowering.

Fuchsias.

Beautiful Fuchsias

If properly cultivated and a suitable place be had where the plants are protected from the midday sun, few flowers can equal the Fuchsias in gracefulness and beautiful showy flowers perpetually coming on. The secret of success with Fuchsias is to keep the plants properly watered and nourished to stimulate fresh, continuous growth, and consequently flowers. This satisfactory result requires repeated repotting if plants are kept in pots, or if planted out, much mulching with cow manure and watering.

VERONA

A handsome new variety of the Elegantissima type, somewhat resembling *N. Whitmanii*, but with finer "Ostrich Plume" foliage, and with a stiffer mid-rib, which makes the fronds stand up better than most varieties of the Lace Ferns.

Boston or Fountain Fern.

The Popular Boston Sword Fern

(*Nephrolepis Exaltata Bostoniensis*)—In the vicinity of Boston no other plant is used so extensively as this graceful *Nephrolepis*, which differs from the ordinary Fern in having much longer fronds, which frequently attain a length of four feet. These fronds arch and droop over very gracefully, on account of which it is frequently called the Fountain Fern.

THE "ROOSEVELT FERN"

(*Nephrolepis Roosevelt*)—In general characteristics it resembles the Boston Fern, but with two points of great excellence over that variety. First it produces many more fronds, making it a bushier and handsomer plant; then the pinnae are undulated, giving it a pronounced wavy effect seen in no other Fern. It is highly recommended.

"TEDDY JR."

(Dwarf Roosevelt)—A new dwarf form of the popular Roosevelt Fern; a grand compact grower, making splendid specimens in medium size plants.

MOSS FERN

(*Selaginella Emiliana*)—An upright-growing moss with delicate lace-like foliage. Suitable for Fern dishes or for table and house decorations. Price, 15 cents each; four for 50 cents.

New Fern—Dwarf Boston.

NEW DWARF BOSTON FERN

This new variety produces about twice as many fronds as the old Boston type. It is much more compact thus making a bushier plant and one that can be used in any decorative plan desired; equally useful in porch boxes or baskets. The best of type.

OSTRICH PLUME FERN

(*Nephrolepis Whitmanii*).—An improvement on the *Nephrolepis Elegantissima*, with still more gracefully divided pinnae, giving the whole plant an airy, lace-like appearance; makes beautiful symmetrical plants even in small sizes, and large specimen plants are beautiful beyond description.

NEPHROLEPIS SPARROWII

We take great pleasure in offering to our customers for the first time this new and valuable variety, a true sport of the *Neph. Superbissima* (or fluffy Ruffles) Fern. It has the dark green foliage of its parent, which, with its beautiful crested fronds, makes it a most unique, distinct and desirable Fern. One of the most distinguishable features of this new Fern is its robustness, which makes it a very rapid and easy grower, a Fern the amateur can grow with success. We recommend this new variety most highly.

Selaginella Emiliana ("Moss Fern.")

Dwarf Growing FERNS for Dishes

We have grown a large quantity of small Ferns suitable for Fern dishes. The use of ferneries as ornaments for the dinner table is now very general. Nothing makes so fine an ornament, or is so well adapted for the purpose.

Cyrtomium Falcatum

(Holly Fern.) We consider this one of the finest Ferns in cultivation to grow into specimen plants, and while it is coarser than the Tremula Fern, it is very graceful and is becoming very popular. The leaf is a rich, glossy green, and each leaflet is about the shape and size of a Rose leaf. The fronds are fine for cutting on account of their lasting quality.

Alba Lineata.

Pteris Cretica Alba Lineata

A very handsome Fern, nicely variegated, grows very rapidly into handsome plants.

Pteris Wilsoni

An ornamental Fern of unusual merit. One of the most dwarf of this class, having deep green foliage, leaves heavily crested, giving it the appearance of a tassel. A fine addition to the ornamental varieties.

It produces long, graceful stems which terminate in tapering panicles of beautiful lilac-colored flowers that are of miniature size and borne by the hundreds on a flower head which is frequently ten inches long. Hardy Outdoor Ferns

Just the thing for that shady place around your house where most flowers will not do so well.

Plant these Ferns about 12 inches apart, the crown level with surface of ground, and give them a thorough soaking to settle the soil around the roots and a mulch to preserve moisture.

The planting season runs from October 1st to June 1st. Fall planting gives the soil a chance to settle solid around the roots which will insure stronger growth the first year.

Foundation Planting of Hardy Ferns.

HARDY FERNS

We offer only the four most popular varieties.

One each of the four, postpaid, for \$1.25.

The hardy fern is recognized as one of the most attractive plants for decorative and ornamental purposes in natural groves, parks and private gardens. Most of our native ferns do well under cultivation, and they do especially well in shady and half shaded places; are very useful for growing close to houses and in corners which are too shady for other plants.

Most ferns do best in a light soil containing much vegetable matter, and it is always best to work a considerable amount of leaf mold into the soil of a fern bed. While few ferns grow well in very dry soil, the common notion that they require very wet or almost swampy conditions is not well founded. Most of them, even those that grow naturally in very wet places, do nicely under ordinary garden treatment, in the matter of moisture.

While the native ferns are, of course, perfectly hardy, most of them are better off with a light covering of leaves in winter. In their natural habitat they are usually well covered with leaves and snow throughout the winter.

HARDY MAIDENHAIR FERN—(*Adiantum Pedatum*.) Perhaps the most graceful of all; attains a height of 12 to 18 inches when grown in rich, moist, well drained shady locations. **Each 35 cents; 6 for \$1.75.**

CHRISTMAS FERN—This fern, when grown under ideal conditions, attains a height of three feet, its peculiar grace and beauty makes it desirable in all fern gardens. **Each 35 cents; 6 for \$1.75.**

OSTRICH FERN—(*Onoclea Struthiopteris*.) Growing in a crown, fronds 2 to 4 feet by 6 to 10 inches wide; a very erect handsome species, graceful as a palm. Its vase like masses of foliage are dark green and is one of the tallest of our ferns and should be planted well back. **Price, 25 cents each; 6 for \$1.25.**

INTERRUPTED FERN—(*Osmunda Claytoniana*.) A large fern growing in a crown 2 to 3 feet high, 8 inches broad, clothed with rusty wool when young, very beautiful, cinnamon colored leaves. Does well under cultivation in high, shady or open place. **Price, 40 cents each; 6 for \$2.00.**

BEST GRAPES

Grape vines will grow almost everywhere, but to produce the finest specimens they should be carefully cultivated and pruned. A south or southwestern exposure will, as a rule, give best results. The soil should be dry, and if not naturally so, should be artificially drained before planting.

A top dressing of well-rotted manure should be applied each year, alternated every few years with a dressing of slaked lime.

Our collection consists of six of the very finest grapes grown. Just the thing for the home garden or for covering an arbor. The six varieties are as follows: all strong vines:

BRIGHTON (red), **MOORE'S EARLY** (blue),
WYOMING (red), **CONCORD** (blue),

These are among our most beautiful and interesting winter and spring-flowering plants for the window and greenhouse. Not only are the flowers of striking beauty, but the foliage is also highly ornamental. There are no plants better adapted for pot culture, and few that produce such a profusion of bloom. Most of them are delicately fragrant. The flowers of this magnificent giant strain are of extraordinary size for Cyclamen, and of great substance. The leaves are proportionately large and beautifully marked. We offer the following separate colors:

White with red eye. Dark red.

Rose Pink. Salmon.

Strong plants from 3-inch pots, 50c each; 4 for \$1.75.
